

DID YOU KNOW ...

...you have different kinds of teeth designed to do different things?
Help K-9 learn their names.

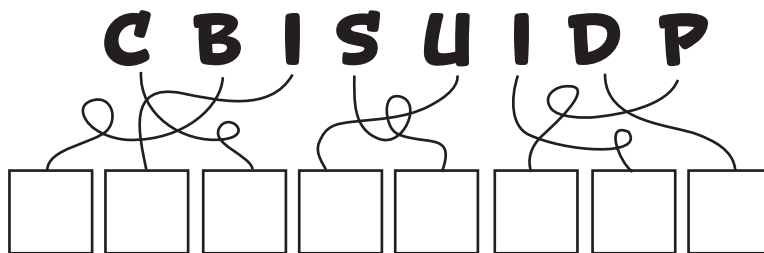

Unscramble the words by following the floss path and then write the letter in the box.

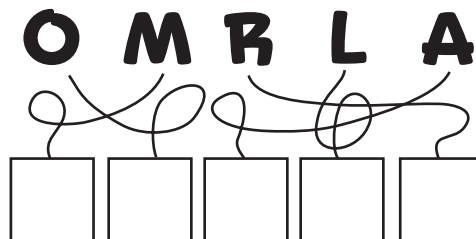

1. These flat front teeth are for biting into food.

2. These teeth tear food into smaller pieces.

3. A second set of food-tearing teeth.

4. These big teeth at the back of your mouth grind food into very small pieces.
